

Nolting Holzfeuerungs-technik GmbH

For more than 75 years Nolting Holzfeuerungs-technik GmbH has been producing high-quality, tailor-made and environmentally friendly combustion plants for biomass in the power range of 70 to 2.500 KW. The company is based in Detmold, Germany and has 50 employees.

The company exports more than 40% of their plants within Europe and Japan.

The plants' unique selling points are:

- Low running costs of plant
- High quality & effectiveness
- High grade of automation

The company is focused on their customers and offers tailor-made solutions from initial planning concept to final installation.

Mr Patrick Schaer, CEO, would like to meet with project developers of renewable energy projects and potential partners for combustion plants such as installation companies.

Further product and company information is available at www.nolting-online.de
